(54) Title: APPARATUS WITH DISPLAY

(57) **Abstract** A display system makes use of removable or de-
tachably display panels (10, 14), which are preferably rollable,
such as cartridges which can be discarded after the display stops
functioning. The actual display has a two part housing (4,5), one
of which contains the removable or detachable display panel.
This housing (4) contains electronics like a battery, input de-
vices (buttons, joystick), a radio frequency (RF) antenna and
chips and possibly memory and processors. The other housing
(5) contains the display panel (14) or substrate (10). If the dis-
play panel (14) or substrate (10) tears, which is not unlikely for
flexible, thin, displays, only the panel has to be replaced and not
the complete device.
